Dear Mr. Sims,

RE: Post Hearings Tasks

We enclose the following items in response to the post hearings tasks:

- Note on comparison of the AM2014 and AM2019 Aggregate Minerals Surveys
- Note on whether the word "enhancements" should be included within the site policy for Chieveley Services (Policy 31) in relation to restoration of the site regarding landscape and Public Rights of Way.
- Note on how the Scope of West Berkshire's Climate Emergency Declaration and Environment Strategy extends to preparation of the Minerals and Waste Local Plan.
- Note on Inert Fill Availability in Relation to Restoration of Allocated Sites

We also enclose a response to EXAM 8 – Richard Anstis for Tyle Mill Consultation Note. Several other documents referred to within this response are also enclosed.

In relation to the task: 'Consideration of access arrangements within SA', we believe this has been adequately considered within the Highways and Transport Topic Paper [EB003] and Sustainability Appraisal [CD006 series], and therefore do not have anything further to add.

Yours sincerely,

Bryan Lyttle
Planning Policy Manager
